

## **Biotechnology Havana 2008**

### **AgBiotechnology: facing huge challenges with new approaches**

November 30th to December 5th, 2008; Havana, Cuba

Following the traditional series of Biotechnology meetings organized by the Center for Genetic Engineering and Biotechnology of Havana, Cuba, the 2008 meeting will be devoted to Agricultural Biotechnology.

#### Symposia and main topics

- Aquatic biotechnology
- Modern biotechnologies for animal health
- Animals as bioreactors and biomodels
- Biosafety in genetic modified organisms (GMO) and bioproducts
- Molecular plant pathogens interaction
- Probiotics and Prebiotics: active ingredients of functional foods
- Control of crop pests with biotechnology tools
- Plant Made Pharmaceuticals
- Ag-Biotechnology business opportunities
